

# Unite all your franchises in one phone system.

The Internet revolutionized communications and yet most businesses still rely on old-fashioned, costly phone systems. RingCentral cloud phone systems are a modern solution; easy to install and set up in minutes (no technician required) and simple to scale to support all your locations, devices and remote workers. You just need an Internet connection and phone. Imagine that.

## Franchise Program

Power your business with a feature-rich phone system for one low monthly price. Our franchise program offers special pricing and dedicated support, just for you.

## Multiple Locations

RingCentral offers the functionality to link all locations, employees and devices on one system and easily transfer calls between locations.

## Smart Mobility

Never miss business, never miss calls and always maintain a professional image. Take your phone system wherever you go, work from home, at client sites, out of your office and on the road with your smartphone or tablet.

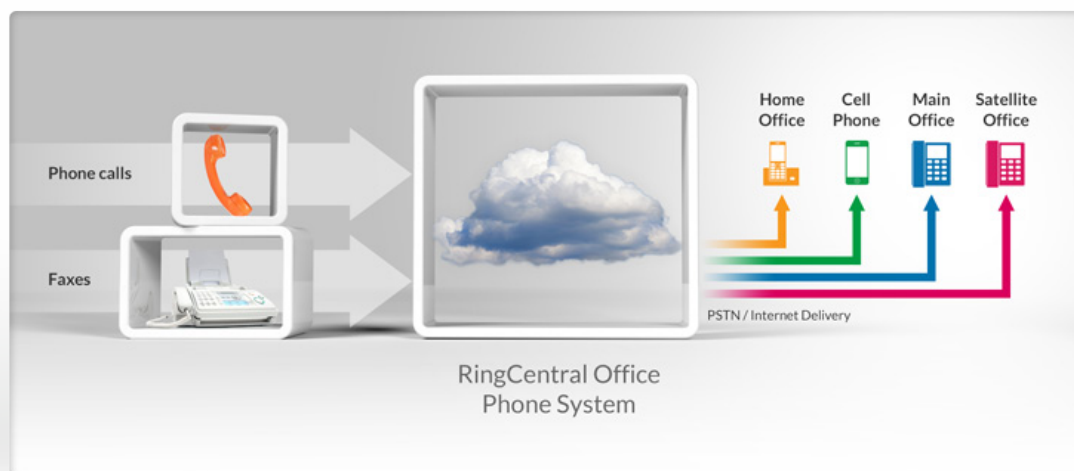

## Ease of Use

Phones arrive Plug&Ring™ ready, simply plug your phones into your existing internet connection and you're good to go. Manage your system yourself, make changes when you need them. There's no need to call a technician or pay for setup and changes.

## Cut Your Costs

There are no set up costs and no contracts required, making for a no-surprise business relationship. All locations are itemized on one bill. Enjoy unlimited calling in the US and Canada, with local and toll-free numbers.

# A complete phone system for all your locations, employees and devices

## About Us

RingCentral launched its pioneering, cloud phone system in 1999, in the heart of Silicon Valley and now serves hundreds of thousands of customers in the U.S. and Canada.

Based in San Mateo, California, RingCentral has earned top industry honors, including PC Magazine Editor's Choice Award, the Small Business Computing Excellence in Technology Award and the 2010 World Economic Forum Technology Pioneer Award.

Privately held, RingCentral is backed by Silicon Valley based venture capitalists, including Sequoia Capital, Khosla Ventures and Cisco. RingCentral has partnerships with AT&T and Rogers Canada.
